hjav0001@student.monash.edu

Currently pursuing a degree in Information Technology, I am eager to utilize my acquired skills from past and present experiences to this role, undertake this opportunity to perform and excel in this position and enhance my professional employability skills.

EDUCATION

MONASH University - *Master of Information Technology*

2019 - PRESENT

NUST, Pakistan - *Bachelor of Software Engineering*

2014 - 2018

EXPERIENCE

BKindred, Australia - *Student Project Consultant*

July 2019

BKindred is a global education company focused on providing corporate employee training and building intentional adaptability of individuals and organizations.

- Worked as part of a student consulting team tasked with providing a detailed competitor analysis for the organisation in order to understand who the competitors are both online and offline globally, where they sit in terms of their points of difference and their pricing and business models.
- Interacted with former and potential BKindred clients while performing market analysis, including attending a client meeting with NAB HR division alongside company officials.

SEECS Library, NUST, Pakistan - *Assistant Librarian*

September 2016 - March 2017 (Part-Time)

SEECS Library is a small library set up inside the IT faculty with a capacity to accommodate around 200 students and holds approximately 3000 books.

- Provided front desk support for students and staff. Responsible for checking books in and out at the front desk.
- Reaching out to overdue customers for timely return of books and issuing of fines.

inniData Pvt. Ltd, Pakistan - *Software Development Intern*

June 2017 - August 2017

InniData is a software solution provider specializing in software focused on pharmaceutical bioanalysis area, while also providing custom solutions for small scale businesses. It is a small company consisting of 15 employees.

- Part of a team of interns that collaborated with a local restaurant, Howdy, to develop a web-based inventory management system. Developed the back-end of the website using Ruby-on-Rails technology.
- Learned and observed real world software development using agile development techniques. Development team was working on a large scale pharmaceutical software designed to automate the manufacturing of medicinal drugs.

Synergy Computers Pvt. Ltd, Pakistan - *Intern*

June 2016 - August 2016

Synergy Computers (Pvt) Ltd. is one of the leading technology companies in the country providing the best off the shelf solutions for small and large scale businesses, specializing in Oracle Technologies.

- Got hands-on training and experience on Oracle 12c database and learnt integral concepts such as database backups, recovery and administration.

VOLUNTEER WORK

Justajoo, Pakistan

2017 - 2018

Justajoo is an NGO based in Lahore that serves the community in areas of need included but not limited to Flood Relief, Internally Displaced Persons (IDPs), Ineducation, Poverty.

- Volunteered in the annual month-long food donation drive during the month of Ramadan. Part of the logistics team tasked with the packaging and distribution of the food. Responsibilities also included crowd control, which was more than a 1000 individuals everyday, acquiring food from vendors and collecting donations.
- Contributed as a graphic designer to the marketing team, creating designs for social media advertising and fundraising.

NUST Community Services Club, Pakistan

October 2016

NUST Community Services Club is a university club focused on facilitating the underprivileged and helping students focus their energies to bringing a positive change in society.

- Participated in a Water Filter Installation Drive at Afghan Refugee Camp, Islamabad. The area is home to thousands of refugees and have limited access to clean water. Part of a team assigned to survey the area and find suitable locations where water filters should be installed. Completed the survey and gained valuable feedback from the project lead.

SKILLS

- Technology skills include intermediate knowledge in Python, Ruby and JavaScript programming languages along with HTML, CSS, SQL.
- Highly adaptable and flexible in performing a range of tasks and possess the experience of working in a diverse team on multiple projects.
- Proficient in Microsoft Office Suite with particular expertise in creating engaging PowerPoint presentations.
- Intermediate knowledge in deployment tools e.g. Docker.
